PROJECTS

ShopKart   Project-Link
Tools: HTML5, CSS3
Description: ShopKart is a modern E-commerce website UI design to provide users with a seamless shopping experience. Implemented CSS for layout customization, responsiveness, and enhanced visual appeal. The project demonstrates effective use of clean code practices and fundamental web development principles.

Portfolio
Project-Link

Tools: HTML5, CSS3, Javascript
Description: Designed and developed a personal portfolio website to showcase skills, projects, and achievements as a Fullstack developer. The website features a modern and responsive design, ensuring optimal usability across devices. Utilized JavaScript to add interactivity, including smooth scrolling, dynamic content, and user-friendly navigation. Emphasized clean and professional aesthetics to reflect a strong personal brand. This project demonstrates the ability to combine creativity and technical skills to build engaging web experiences.

Library Management System
Project-Link

Tools: Java, JDBC, MySQL
Description: Developed a Library Management System using Core Java, JDBC, and MySQL, focused on handling CRUD operations efficiently. The system manages both User and Admin modules, providing functionality for user Authentication, Get books with duedates, Give book rating, and view books. The Admin module includes capabilities to insert, update, view, and delete books, Authors and Languages, Authentication and view over duedate users list. Utilized MySQL joins for relational data handling and count functions to display statistics on books, users, admins, languages, and authors. The application is console-based, designed to run continuously using a while loop, with robust exception handling to ensure smooth operations.

MedCare
Project-Link

Tools: C#, ADO.NET, ASP.NET MVC, SQL Server
Description: MedCare is a comprehensive web-based application designed for efficient management of a medical shop. The system includes Admin Login, Stock Medicines Management, Manage medicines displayed on shelves, Streamline the movement of medicines between stock and shelf, ensuring accurate inventory records.
